

**Velocity** is a managed services provider, meeting the needs of clients in the retail, hospitality and motion picture industries. Specifically, Velocity provides and sells (1) voice and data communications; (2) VOIP/SIP trunking and hosting; (3) network monitoring; software-defined networking services (V-SD-WAN); (4) in-room entertainment, internet and Wi-Fi network solutions; (5) photo and poster printer service, support and supplies; (6) digital imaging solutions (flat panel displays) and content for use as signage and for advertising and promotional purposes; (7) fulfillment services related to the delivery and distribution of movie posters, standees, 3-D glasses and other promotional materials to film exhibitors; and (8) a wide variety of other managed services.

**Velocity** has a substantial, in-house solution development team that produces both internal and external hardware and software solutions designed to support Velocity's managed service offerings and client application needs. Through the work of the development team, Velocity has acquired several design and utility patents for its hardware and software solutions. These solutions enable Velocity to offer highly customized, customer focused, and best in class software as a service solution, integrating the latest technologies available into its product offerings.

## SOLUTIONS

Monitor your IT infrastructure to ensure systems, apps, services, and business processes are firing on all cylinders.

Replace your existing MPLS networks with state-of-the-art software that allows users to leverage multiple connections & network paths to increase uptime and save money.

Exchange multiple devices within your network with one bandwidth manager that reduces costs and supports technology requirements.

Utilize existing internet connections to save money, lower equipment costs, and control call flow with flexible, nationwide voice services.

Increase retention and make your guests stay more enjoyable with Velocity's in-room hospitality streaming solution powered by Chromecast.

## IN GOOD COMPANY
