A modern, affordable alternative to POTS

Velocity's Instant Analog™ lines provide enterprises with the core voice functionalities of POTS (plain old telephone service) without the clunky and expensive copper infrastructure. We provide reliable, managed, SIP-based analog phone lines that connect to new or existing elevator emergency lines, security alarm system lines, fire panel lines, fax machines, or other uses.

This cost-effective alternative to POTS not only saves you time on your project build-out but also allows you to operate your critical infrastructure where the big local exchange carriers cannot. Backed by Velocity's robust, nationwide SIPBand VoIP Network and supported 24/7/365 by Velocity's Network Operations Center, our Instant Analog services offer a modern, affordable and reliable solution for your telecommunications needs.

What's Included
- Velocity SIP-to-Analog FXS gateway
- Professional installation and connection to existing analog endpoints
- Proactive monitoring and managed support available 24/7/365

Benefits of Instant Analog™
- Eliminates months of planning, construction, and installation required for analog lines
- Reduces costs associated with critical telecom infrastructure
- User-friendly network management through the V-SELECT® interactive portal
